

Yair Lopez

Chicago, IL · (312) 468-3027 · lopez16y@gmail.com

Portfolio: <https://ylo16.github.io/>

TECHNICAL SKILLS

Languages: JavaScript, Java, HTML, CSS, SQL, Python

Frameworks: React, Node.js, Express.js

Tools: Git, GitHub, MySQL, Firebase, Railway, Brevo API, Web Scraping

Concepts: REST APIs, Relational Database Design, OOP, Data Structures & Algorithms, Cybersecurity Fundamentals, Networking

PROJECTS

MicroTrack — Budgeting & Expense Tracker | March 2026

- Built a full-stack budgeting web application using **HTML, CSS, JavaScript, Node.js, Express.js, and MySQL** with user login/signup, budget creation, and expense tracking against monthly limits.
- Integrated a **web scraper API** for real-time price tracking so users can make cost-aware spending decisions.
- Designed **RESTful API** endpoints with **Express.js** and optimized client-server communication using asynchronous **Fetch** calls
- Used **Firebase** for authentication and **Brevo API** for automated email budget summaries.
- Designed a relational **MySQL** database schema for users, budgets, purchases, and price history; deployed on **Railway**.

Saint Xavier University — Original Frontend Recreation | November 2025

- Built an original frontend version of the Saint Xavier University website from scratch using **HTML, CSS, and JavaScript**, replicating the site's structure and design independently.
- Implemented responsive layouts using **CSS Flexbox and Grid**, ensuring consistent rendering across desktop and mobile viewports.
- Used a custom **web scraper** to extract reference content from the live site, then rebuilt and organized it into clean, structured HTML pages.
- Applied semantic HTML and accessibility best practices throughout to produce a professional, navigable multi-page site.

EDUCATION

Saint Xavier University | GPA 3.96/4.0 | Expected May 2027 | B.S. in Computer Science w/ minor in Finance

Relevant Courses:

Principles of Programming I & II (Java/Python); Data Structures & Algorithms (Java); Database Theory & Design (MySQL); Software Engineering (JavaScript, HTML, MySQL, Java, GitHub, Fetch API); Introduction to Networks (Cisco); Web Applications (HTML, CSS, Javascript)

EXPERIENCE

Handshake AI — AI Training Contributor · Remote | March 2026 – Present

- Trained and evaluated AI models using multi-modal data (audio, image, text) to improve accuracy across classification and transcription tasks.
- Built and executed data labeling and validation workflows to ensure high-quality training datasets for model performance.
- Performed quality assurance on model outputs, identifying edge cases as well as improving consistency in a distributed engineering environment using Slack and version control.

Valet Attendant — Metropolitan Valet · Chicago, IL | February 2025 – August 2025

- Managed real-time vehicle logistics for high-volume events using systematic key and ticket tracking, achieving zero incidents.
- Handled confidential client data and high-value assets with strict accountability and professionalism.
- Operated a digital ticketing system to process payment transactions and maintain accurate, real-time data records across high-volume operations.
